**Dear Hiring Manager:**

I am excited to submit my application for Graduate Software Engineer. I learned about your company through a friend and as your customer I am really inspired by the work you are doing to push through the limits in fintech industry.

Recent graduate with computer science major from National University of computer and emerging sciences and a former accountant I think I will be a great fit in your company and my experience as a freelance programmer will help to increase value in your already enhanced services. The opportunity to work alongside the team that makes payment and receipts a lot easier and on the fingertips of a user will give me a great exposure to enhance my skill and improve my ability to work with a team.

I would like the opportunity of an interview to discuss more about the position and please let me know if you have questions or if you would like to see a specific project sample.

**Thank you for your consideration,**

**Muzammil**
